

# Kingdom Crossing

Marco Canetta & Stefania Niccolini  David Sitbon

*In a faraway land, in the midst of a verdant forest crossed by the Crystal River, is the small Kingdom of Brightspring, ruled by the wise Queen Beavery.*

*Just in the vicinity of the Kingdom, the river splits, forming four islands, which are connected to the shores and to each other by seven bridges. Thanks to these bridges, the inhabitants could reach every region of the Kingdom. Each region, in fact, offered different resources: in one there was plenty of food to be found, another was rich in wood, yet another was conducive to the harvesting of sap... and the seven bridges provided access to all resources.*

*For a long time, the Kingdom prospered peacefully; however, dissent and envy gradually arose among the inhabitants of the various regions. Therefore, the Queen, concerned about the peace of Brightspring, decided to make periodic tours of her Kingdom in order to meet with her subjects and calm their tempers. Out of a sense of fairness and not wanting to displease anyone, she established a path so that each bridge would be crossed once and only once: a double passage, in fact, would inevitably arouse the envy of others, while a missed passage the sadness of some.*

*Thus, following the directions of the Grand Chamberlain in charge of fine-tuning the itinerary, the Queen's procession departed from the Northern Region accompanied by the jubilant chirping of the Robins. Her subjects greeted her with joy but, after crossing the sixth bridge, the Queen realized that the only way she could complete the tour would be to retrace her steps and re-cross one of the bridges already traveled. The day, which began in celebration, ended with long faces and the feeling that they had made things worse instead of better.*

*In the days that followed, the Grand Chamberlain made numerous reconnaissance trips to the Kingdom, but each time he noticed that something was not working: "I've been through here before", "I forgot the middle bridge and I can't go back" were phrases that recurred sooner or later. The people of the Kingdom, seeing the Grand Chamberlain's efforts, felt involved, and every day more and more subjects came to the Court to propose new solutions, but none of them turned out to be the right one in the end.*

*And while the Grand Chamberlain and the inhabitants of Brightspring were studying new paths, the old Mathematician from the Forest came to tell the Queen that all their efforts were in vain: only an eighth bridge would make it possible to complete as expected the much-desired tour without crossing the same bridge more than once.*

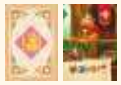

*So the Queen instructed her most trusted counselors to gather the laborers needed for the construction of the new bridge, not an easy task since they too had to pass each bridge only once to avoid displeasing anyone. The paths of the Grand Chamberlain, like those of anyone else, it was now known, did not serve the purpose. Better to proceed by instinct and, in case, hope to use the Balloon to reach another Region and, if possible, get home before the evening shadows fall on the Kingdom.*

## Theme of the game

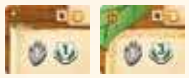

In Kingdom Crossing, you take on the role of a beaver foreman charged by the Queen to gather craftsmanship to secure the resources and decorations needed to build the new bridge. To accomplish this, you must seek the cooperation of the forest animals by going around the Kingdom without ever being authorized to cross the same bridge more than once in the same day. The animals of the Forest, divided into five Guilds, not only provide you with the necessary resources, but also offer their support in various ways: the guild of the wily Foxes grants you immediate Prestige; the guild of the wise Owls provides you with money; the guild of the powerful Bears allows you to gain advantages from your structures; the guild of the impetuous Wild Boars allows you to improve your movement around the Kingdom; and finally, the guild of the selfless Deer offers you additional lumber, stone, sap, or food.

Choosing which turn to take and who to rely on will not be an easy task for you, but it will decide which of you the Queen will entrust with directing the construction of the eighth bridge.

# General components

- 1 Main board 
- 1 Tree board 
- 4 Player boards 
- 26 Favor of the Queen tiles 
- 6 Bridge goal tiles (double-sided) 
- 40 Bird tokens ( x12, x12, x8, x8) 
- 80 Character cards (8 decks of 10 cards each) 
- 20 Structure cards (2 decks of 10 cards each) 
- 5 Queen cards 
- 4 Starting cards 
- 20 Flower tokens ( x8, x8, x4) 
- 20 Sculpture tokens ( x8, x8, x4) 
- 60 Coin tokens (x32, x18, x10) 
- 4 Empty deck tiles 
- 4 50/100 VP marker 
- 1 First player token 
- 1 Balloon pawn 
- 14 Paco & Paca tiles (solo mode only) 
- 1 rulebook

# Player components

- 1 Beaver worker 
- 3 Houses 
- 1 Home card 
- 6 Action tiles (double-sided) 
- 7 Paw markers 
- 6 Bridge goal markers 
- 4 Resource markers (Lumber, Stone, Sap and Food) 
- 1 Invest marker 
- 1 Score marker 

# General setup

1. Place the main board at the center of the table, with the Tree board next to it.
2. Sort the 80 Character cards according to their back  , then do the same with the 20 Structure cards  to form a total of 10 face down card piles (10 piles of 10 cards each). Randomly place one pile face down on each of the 10 corresponding slots of the main board. Then reveal the top card of each deck face up.
3. Sort the 40 Bird tokens according to their back  and place them as a face down pile on their corresponding space in each of the 4 regions of the main board.
4. Take the 5 Queen cards  and return one of them to the box without looking at it. Then form a face down pile with the 4 remaining cards and place it on the corresponding space of the Tree board.
5. Take the 6 Bridge goal tiles and place each of them on a random side on the 6 corresponding spaces of the Tree board.
   **Note:** for your first game, you may choose to place all the Bridge goal tiles on their Easy side  .
6. Shuffle the 26 Favor of the Queen tiles  and form 3 face down piles of about equal size you place on the corresponding spaces of the Tree board. Reveal 1 Favor of the Queen from each pile and place it face up on the right of each pile.
7. Place the Flower  and Sculpture  tokens next to the main board.
8. Place the coins as a common supply next to the main board: they are considered unlimited.
9. The last player who walked in the forest takes the first player token  and will start the game.

## Player setup

**Each player does the following:**

They take a player board and the components from the corresponding color: 1 Worker, 3 Houses, 7 Paw markers, 6 Bridge goal markers, 1 Investment marker and 1 Score marker. They also take 1 Home card, a set of 6 Action tiles (double-sided) and 4 Resource markers (Lumber, Stone, Sap and Food).

1. They place their 6 Action tiles at the left of their player board non-upgraded face up.

2. They place their 7 Paw markers and 2 of their 3 Houses on the corresponding slots of their player board.

3. **A.** They place their 4 resource markers on the leftmost space of their corresponding resource tracks (space 0), then **B.** they place their 6 Bridge goal markers on the corresponding slots of their player board.

4. **A.** On the main board, they place their Investment marker on the leftmost space of the Investment track, then **B.** they place their Score marker in the 0 space of the Score track.

5. They tuck their Home card at the bottom of their player board, on the left, leaving the Income visible.

6. They keep their Worker and 1 House aside.

# Starting the game

Take the 4 Starting cards: place as many as the number of players (on a random side) next to the main board. Return any unused starting card to the box. Then, reveal as many Favors of the Queen as the number of players (from any pile already set up) and place one under each starting card, to form pairs of Starting card + Favor of the Queen. In reverse turn order, each player chooses a pair: they place the Favor of the Queen next to their player board and do the following with the Starting card:

- **Coins:** take from the common supply the coins indicated on the card.
- **Invest:** perform an Invest action, if indicated (see page 6).
- **Resources:** advance your corresponding resource markers on your player board.
- **Flower / Sculpture:** take from the common supply and place a Flower or Sculpture token with 1 symbol (1 or 2 stars) on any corresponding space of your player board.
- **Starting Home:** place your Worker and your House in the region where the indicated bird lives.
- **Guild:** place your Starting card in the corresponding Guild column above your player board.

The first player places the Balloon in the region in which they start the game.

# Main concepts of the game

## REGIONS AND BRIDGES

The main board is divided into 4 regions, connected together with 7 bridges. In each region you may find Characters to meet or Structures to use. Players' Workers move from one region to another, crossing bridges they did not already cross during the round. Optimizing your movement is an important path to victory!

## CHARACTERS

There are 8 types of Characters, each of them belonging to one of the 5 Guilds: **Fox guild**, **Owl guild**, **Bear guild**, **Wild Boar guild** and **Deer guild**.

When you hire a Character, spend the coins indicated in red on the card (by returning them to the common supply). Then resolve its effect and place it in the column above your player board that corresponds to the Guild this Character belongs to.

**Sponsors:** you gain coins when you hire them.

**Lumberjacks:** you collect Lumber when you hire them.

**Stone cutters:** you collect Stone when you hire them.

**Extractors:** you collect Sap when you hire them.

**Farmers:** you collect Food when you hire them.

**Florists:** you place Flower tokens on your player board when you hire them.

**Sculptors:** you place Sculpture tokens on your player board when you hire them.

**Peddlers:** you receive various resources or bonuses from them.

## STRUCTURES

There are 2 types of Structure: both of them give you an immediate bonus which is also an income you collect at the beginning of each round.

**Buildings:** they are free and reward you with coins depending on your strategy.

**Transports:** they cost you coins and give you various bonuses (resources or VP).

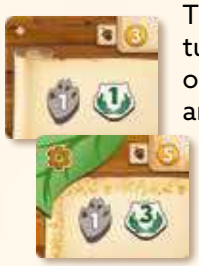

## QUEEN

When you meet her, you receive a small bonus and the First player marker. Only one player can meet the Queen each round.

## ACTION TILES

They are the key mechanic of the game: on your turn, you must choose one of your available (still on the left of your player board) Action tiles to rest and gain coins OR to cross the indicated number of bridges you did not cross yet this round. If you do so, you must be able to hire a Character (or use a Structure) from the region where you stopped by, gaining bonuses from them. During the game, you will get opportunities to upgrade your Action tiles by flipping them on their upgraded side.

## BIRDS

There are 4 types of birds, who each live in a region of the main board. At the beginning of each round, one Bird token is placed face up on each card (Character or Structure) from their region, so the player who picks cards early will also receive help from the birds by gaining their bonus.

### BALLOON

Using the Balloon is the only way to place all your 7 Paw markers on the main board and to get movement flexibility, but it comes at a cost!

### PLAYER BOARD (RESOURCES AND DECORATIONS)

Your player board represents your efforts to participate in the building of the 8th bridge, so accumulating resources and getting Decorations will help you on your path to victory!

In general, you accumulate resources (Lumber, Stone, Sap and Food) for the final scoring and for fulfilling Bridge goals. However, when you reach a specific space on each track, you obtain an immediate bonus. Furthermore, when you reach the last space of any resource track, you gain a Favor of the Queen.

You also place Decoration tiles (Flowers and Sculptures) on your player board to score your Character cards at the end of the game, only if your resource marker has passed these Decoration tiles.

### BRIDGE GOALS

At the beginning of the game, 6 Bridge goal tiles are placed on the main board: they symbolize the Queen's demands to build the 8th bridge. Each Bridge goal is double-sided, one side being easier to complete than the other. During your turn, you may validate a Bridge goal, and the quicker you do it, the more VP you gain.

### FAVORS OF THE QUEEN

Favors of the Queen are personal objectives that score VP at the end of the game. They can be gained in various ways during the game.

### INVEST ACTION

The Invest track is a way to gain coins: everytime you encounter this icon, choose one of the following:

- Make your marker progress one space on the Invest track.
- Gain the coins indicated by the position of your marker, then return it to the leftmost space of the track.

### COINS

Any time you gain coins, take them from the common supply. When you spend coins, spend them from your personal reserve and return them to the common supply.

### VP

Any time you gain VP during the game, advance your Score marker on the Score track accordingly.

### ENDGAME VP

You score this kind of VP at the end of the game only.

## How to play

The game is divided into 4 rounds, each of them divided into 3 phases:

**1) MORNING PHASE:** in turn order, players collect their Income (**A**), then Birds arrive in the forest (**B**), and the Queen awakes (**C**).

**2) NOON PHASE:** in turn order, each player selects one Action tile and resolves it.
The Noon phase ends when each player has played 4 Action tiles.

**3) EVENING PHASE:** in turn order, if your Worker ends the round in a region with one of your Houses, choose one Income to collect.

# 1) MORNING PHASE

## A) INCOME

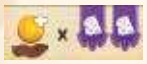

In turn order, collect your Income. Income is collected from 2 different sources:

**GUILD INCOME:** over the course of the game, you place Character cards in the corresponding columns at the top of your player board. For each two cards in a column, you collect an income, in the order of your choice:

**Fox guild:** for each two cards here, gain 2 VP.

**Owl guild:** for each two cards here, perform an Invest action. To perform an Invest action, choose one of the following: Make your marker progress one space on the Invest track OR gain the coins indicated by the position of your marker, then return it to the leftmost space of the track.

**Bear guild:** for each two cards here, trigger the ability of one of your Structures. Should you trigger the ability of several structures this way, they must be different.

**Wild Boar guild:** for each two cards here, upgrade one of your Action tiles by flipping it on its upgraded side. If you cannot, gain 2 VP instead.

**Deer guild:** for each two cards here, gain a resource of your choice (Lumber, Stone, Sap or Food) and advance your marker on your player board.

**STRUCTURE INCOME:** trigger the ability from all your structures, including your starting Home.
**IMPORTANT**: During the first Income phase of the game, do not forget to trigger the ability from your starting Home, which is to perform an Invest action.

**Example: Marco** resolves his round 3 income this way:
1. **Fox guild**: he has only 1 card so he gains no income from this guild.
2. **Owl guild**: he has 4 cards so he can perform two Invest actions: he decides to make his marker progress one space on the Investment track twice.
3. **Bear guild**: he has only 1 card so he gains no income from this guild.
4. **Wild Boar guild**: he has 3 cards so he can upgrade one of his Action tiles.
5. **Deer guild**: he has 2 cards so he gains a resource of his choice: one lumber, which makes him reach space 5 and gain the immediate bonus from this track: 3 coins.
6. **Structures**: his Starting Home makes him perform one Invest action: he decides to gain the coins indicated by the position of his marker, then he returns it to the leftmost space of the Investment track. He also triggers his other 2 Structures abilities: 1 VP for each card from the Owl guild (4 VP since he has 4 cards from this guild) and 1 Stone.

### B) THE BIRDS ARE COMING

For each region, return to the box the birds from the previous round still on cards (if any), then place one bird face up on each card (Character or Structure) from its region.

**2&3-player games only:** some Bird tokens have a "3" or a "4" symbol at their bottom. If this number is higher than the number of players in the game, discard these Bird tokens. This means some Character or Structure cards will have no Bird token on them for this round.

**Example:** **Stefania** places the Bird tokens on the Character and Structure cards from the corresponding regions. Since she is playing a 2-player game with **Marco**, she returns all the birds marked with a "3" and a "4" to the box.

### C) THE QUEEN AWAKES

Return the Queen card from the previous round to the box (if any), then reveal the next one from the pile.

## 2) NOON PHASE

Each round, starting with the 1st player, you perform 4 Actions (one at a time, proceeding clockwise).
When comes your turn, you must select one of your Action tiles at the left of your player board and choose to **Rest** or to **Work**:

**Rest:** Move the Action tile to the right of your player board and gain the coins indicated in the Rest section of the tile.

**Example:** **Marco** selects this upgraded Action tile, moves it to the right of his player board and decides to **Rest** to gain 8 coins.

**Work:** Move the Action tile to the right of your player board and activate it. All the tiles (except one) make your Worker move without interruption by crossing an exact number of bridges you did not cross this round and connected to the region where your Worker currently is. Every time you cross a bridge, you must place one of your Paw markers on it as a reminder you crossed it this round.

Gain 2 coins. Your Worker must cross 1 bridge.

Gain 1 VP. Your Worker must cross 1 bridge.

Your Worker must cross 1 bridge, then you may spend 4 coins to gain one resource of your choice (once) anytime during this turn.

Your Worker must cross exactly 2 bridges.

Your Worker must cross exactly 3 bridges.

After moving, follow these steps in order :

**1)** Choose a card to purchase (Character or Structure). Remember that, at the end of the movement, you have to purchase a card from the region you stopped by. If you are not able to do it, you must choose **Rest** instead of **Work**.

**2)** Meet a bird: if there is a Bird token on the card, resolve its bonus (if able), then place it face down next to your player board.

**3)** Hire a Character or use a Structure by paying its cost (in coins):
**Character:** spend the indicated coins (if any), then immediately resolve their effect and place the card in the corresponding Guild column above your player board.
**Structure:** spend the indicated coins (if any), then immediately trigger the ability of the Structure and tuck it below your player board, with the Income part visible.
Then reveal the next card of the deck face up.

**4)** You may claim one or several Bridge goals (see Claiming a Bridge goal on page 10).

**Example: Stefania** uses the Action tile allowing her to gain 2 coins and cross one bridge. She places her Paw marker on this bridge (1) and her worker stops their movement in the region. She chooses to hire a Lumberjack but first, she meets the bird which was placed on this card at the beginning of the round: she takes the bird and places it face down next to her player board (2) and resolves its bonus: gain 2 coins. Then she hires the Lumberjack: she spends 7 coins and makes her Lumber marker progress 2 spaces (3).

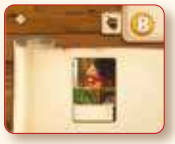

**IMPORTANT:** When a deck runs out of cards (this might happen more frequently in 4-player games), reveal a random empty deck tile and place it in the empty space. The tile remains in place until the rest of the game, allowing players to benefit from its effect.

Your Worker does not move and remains in their region. Claim the Queen card for this round and take the 1st player token: apply the card's effect, then place it in the corresponding Guild column above your player board. Since exactly one Queen card is available each round, visiting the Queen can be performed once per round only (for all players).

**IMPORTANT:** When you place your 6th Paw marker, you immediately gain 3 VP, then when you place your 7th Paw marker, you immediately gain 4 VP: in other words, if you place all your 7 Paw markers in the same round, you score 7 VP in total.

**Example**: **Marco** decides to use the Action tile allowing him to visit the Queen as the Queen card is still available: he takes the Queen card, takes the First Player token and resolves its effect twice (instead of once) because he upgraded his Action tile.
Then, he places the Queen card in the corresponding guild column above his player board.

## HOUSES

When you have placed 1 card from each guild above your player board, place your leftmost House in a region without one of your Houses.
When you place your last House, gain a Favor of the Queen .

## BALLOON

Using the Balloon is the only way to place all your 7 Paw markers on the main board. But it is also useful if you want to cross a bridge you already crossed this round (without placing a 2nd Paw marker on it).

You may use the Balloon only when choosing the **Work** action, before OR after placing your Paw markers when crossing bridges, but never in the middle of your movement. In all cases, you use the Balloon before hiring a character or using a structure.

To use the Balloon, you must spend coins: if the Balloon is in the same region as your Worker, using it costs you 3 coins. If not, using it costs 10 coins.

Move your Worker and the Balloon to the region of your choice: do not place any Paw marker for doing so. You may move to a region even if you placed Paw markers on all the bridges connected to this region: you are using air transport after all!

**Example:** The Balloon is not in the same region as **Stefania's** worker: she spends 10 coins to bring the Balloon to the same region (1), then she moves it with her worker to another region (2).

Then, she must Work, using the Action tile allowing her to cross 2 bridges. By doing so, she places her 6th and her 7th Paw markers: she scores 3+4 = 7 VP for placing her last two Paw tokens on the main board (3). She can now hire one of the two Characters.

## 3) EVENING PHASE

In turn order, each player resolves these steps:

**A)** If your Worker is located in a region with one of your Houses, choose one Income to collect: one Guild income OR one Structure income.

**IMPORTANT:** If you choose a Guild income, and there are 4 or 5 cards in the corresponding column, you trigger its income twice. You trigger it three times if there are 6-7 cards, etc.

**B)** Then, return the 4 Action tiles you played this round to the left of your player board, so all your 6 Action tiles are available for the next round. When doing so, be careful not to flip them on their other side!

**C)** Take your Paw markers and place them back on the corresponding space on your player board.

**D)** You may claim one or several Bridge goals.

**Example:** **Marco's** Worker ended the round in a region with one of his Houses: he can choose one income to collect. He chooses to collect the Owl guild income. Since he has 4 cards there, he can perform 2 Invest actions: he decides to make his marker progress on the Investment track twice.

## CLAIMING A BRIDGE GOAL

After performing an Action (**Rest** or **Work**) or at the end of your Evening phase, you may claim one or several Bridge goals if you meet its condition. Place one of your Goal markers on the claimed tile, on the leftmost available spot (the one with the most VP) and immediately score the VP indicated on it.
If you placed a Goal marker on both Bridge goals from the same row, you also gain a Favor of the Queen (**see Gaining a Favor of the Queen below**).

**IMPORTANT**: in a 2-player game, the second player always places their Goal marker on the 3rd position.

**Example: Stefania's** Lumber marker reached space 3 of the track this turn (1), and her Sap marker is on space 5 (2).

This makes her claim this goal second because **Marco** already claimed it earlier: since in a 2-player game, the player who comes second must place their Goal marker on the 3rd slot, **Stefania** does so and scores 1 VP (3).

This is the second Goal marker she places in the same row, so she claims a Favor of the Queen (4).

## GAINING A FAVOR OF THE QUEEN

There are several ways to gain a Favor of the Queen:

- You start the game with one.
- Claiming both Bridge goals from the same row.
- Collecting 10 of a resource type (Lumber, Stone, Sap or Food).
- Placing all your Houses on the main board (by hiring 2 Characters from each different Guild).
- One Peddler character allows you to take one.

When you gain a Favor of the Queen, choose one of the 3 face-up tiles or draw a random one from any pile. If you choose a face-up one, refill it immediately.

Favors of the Queen score VP at the end of the game. If one pile runs out, refill by taking the tile from one of the other piles.

**Example: Marco's** marker just reached space 10 of the Stone track: this makes him gain a Favor of the Queen. He decides to pick the middle one and places it next to his player board.

It will score him VP at the end of the game. Then, he refills the emptied slot with a new favor.

# End of the game

When the 4th round ends, the game is over. Players must spend their unused coins this way: for each 5 coins spent, they progress one space on the Invest track. Then, players calculate their score by adding the following VP to the VP they scored during the game.

- **Invest track:** Score VP corresponding to the position of your Invest marker.
- **Guild Cards:** For each Guild (except the Deer guild), score VP this way: multiply the number of cards from this Guild placed at the top of your player board by the number of stars your resource marker passed on. Stars are indicated on the Flower & Sculpture tokens you placed on your player board during the game. Each resource corresponds to a Guild: Lumber for the **Fox guild**, Stone for the **Owl guild**, Sap for the **Bear guild**, Food for the **Wild Boar guild**.
- **Structures:** Look at your least advanced resource marker to determine the VP value of each of your Structures. Remember that your starting Home is a Structure.
- **Favors of the Queen:** Score each of them according to the way they score VP. Refer to the Appendix for more details.

The player with the most VP wins the game. In case of a tie, the tied player with the most coins left wins the game. If the tie remains, tied players win the game together.

**Example: Stefania** scores her points: her score marker is currently on space 46 of the score track, then she adds these VP:

1 **Invest track:** She spends 10 coins (from her 12 remaining ones) to make her Invest marker progress two spaces, making it reach the 7 VP space.

2 **Guild cards:** Her Lumber marker passed a decoration tile with 2 stars: she scores 2 VP for each Fox card, for a total of 6 VP. Her Stone marker passed two decoration tiles with 1 star each: she scores 2 VP for each Owl card, for a total of 8 VP. Her Sap marker did not pass any decoration tile, so she does not score any VP for Bear cards. Her Food marker passed a decoration tile with 1 star: she scores 1 VP for each Wild Boar card, for a total of 3 VP.

3 **Structures:** Her least advanced resource marker is on space 3, which makes her score 3 VP for each Structure card. Since she owns 3 of them, she scores 9 VP.

4 **Favors of the Queen:** She owns two: one scores her 1 VP for each Bird token (7 VP) and the other scores her 2 VP for each Wild Boar card (6 VP). She scores a total of 13 VP for the Favors of the Queen.

**Stefania's total score is 92!**

# Solo rules

In the solo mode, you play against Paco & Paca, two beaver twins who seek the favor of the Queen like you.

## GENERAL SETUP

- Steps 1 to 8: Proceed the same way as in a 2-player game.
- Step 9: Paco & Paca always start the game first: they live in the forest after all.

## PLAYERS SETUP

Your setup is unchanged, then proceed to Paco & Paca's setup:

- Choose any unused player's colour and take: **1 player board, 3 Houses, 1 Home card, 6 Bridge goal markers, 4 Resource markers** (Lumber, Stone, Sap and Food) **and 1 Score marker**. Return to the box the remaining components from this player color.
- Place 2 Houses on the corresponding slots of the playerboard.
- Place the 4 resource markers on the leftmost space of their corresponding resource tracks.
- Place the 6 Bridge goal markers on the corresponding slots of the playerboard.
- Place the Score marker in the 0 space of the Score track.
- Tuck the Home card at the bottom of the playerboard, on the left.
- Keep 1 House a side for now.

Randomly take 2 Starting cards and 2 Favors of the Queen and associate them to form 2 pairs. You choose the pair first. Paco & Paca (who are 1st player) take the other and place their House in the corresponding region.

# General concepts for Paco & Paca

Paco & Paca do not have a worker on the main board. They simply take cards from 1 or 2 different regions, without spending coins for them. Paco & Paca do not consider what is depicted on the card: they simply collect Character and Structure cards on their playerboard as you would do.
For each Character card they place on their player board, they advance by 1 space the resource marker linked to that guild:

**Fox guild:** advance the Lumber marker 1 space.

**Bear guild:** advance the Sap marker 1 space.

**Owl guild:** advance the Stone marker 1 space.

**Wild Boar guild:** advance the Food marker 1 space.

**Deer guild:** advance 1 space the resource marker which is further behind. In case of tie, follow this order: Lumber, Stone, Sap and Food (from top to bottom).

When tucking a Structure card at the bottom of their player board, nothing else happens.

If the advanced marker goes beyond an empty space for Flowers or Statues, take the corresponding tile and place it on Paco & Paca's playerboard, to fill that space.

When advancing their resource marker, Paco & Paca take into account this icon  only and therefore gain a Favor of the Queen when reaching it. All other icons are ignored by Paco & Paca.

## DIFFICULTY LEVELS

You may select an easier or more challenging game by using a different set of tiles. You may choose among:

- **Beginner:** 11 Solo tiles + 3 Rest tiles.
- **Initiate:** 11 Solo tiles + 2 Rest tiles.
- **Expert:** 11 Solo tiles + 1 Rest tile.
- **Master builder:** 11 Solo tiles.

Rest tiles

Solo tiles

Return any unused tiles to the box.

# How to play

You and Paco & Paca take turns as in a multiplayer game. During the first round, Paco & Paca start first. Then, the 1st player will change when you or Paco & Paca will visit the Queen (as in a multiplayer game).

## 1) MORNING PHASE

Take the Solo tiles + the selected Rest tiles (if any) and shuffle them together face down. Create a stack with them. Nothing else happens for Paco & Paca, since they do not collect Income.

## 2) NOON PHASE

During Paco & Paca's turn, reveal the first 2 tiles from the top of the stack. Resolve both tiles, separately, in order (reveal and resolve the first, then reveal and resolve the second).

**If the tile indicates a Bird,** take the depicted card and the Bird token on it, if any. The card is tucked on Paco & Paca's playerboard. Advance their corresponding resource marker, as already described. The Bird is simply collected.
Reminder: Paco & Paca consider neither the card effect nor its cost. Furthermore, Paco & Paca do not consider the Bird bonus.

**If the tile indicates the Queen's crown,** take the Queen card, if still available. The card is tucked on Paco & Paca's playerboard. Advance the corresponding resource marker, as already described. If a card is taken, Paco & Paca also take the 1st player token. If the Queen card is no longer available, Paco & Paca go away empty-handed. Then, move the Balloon to the next shore (clockwise).

**If this tile appears,** nothing happens: Paco & Paca are taking some - well-deserved - rest!

## 3) EVENING PHASE

Nothing happens to Paco & Paca.

### CLAIMING A BRIDGE GOAL

Paco & Paca can claim a Bridge goal the same way you would do and score the same way you would do.
Tip: You are not forced to continuously check whether Paco & Paca have fulfilled a goal.

**IMPORTANT**:

- When you claim a Bridge goal, check before if Paco & Paca have not already fulfilled it. If so, place Paco & Paca's marker in first position and place yours in third position (as in a 2-player game, the 2nd slot is not rewarded).
- Before evaluating the final scoring, do a last check for Paco & Paca's goals, in order not to overlook anything.
- Paco & Paca cannot claim this Bridge goal  .

### HOUSES

When Paco & Paca complete a row of cards, they remove a House from their playerboard and place it anywhere on the map: the position of Paco & Paca's houses is not relevant for the game.

### FAVORS OF THE QUEEN

Like any player, Paco & Paca gain Favors of the Queen tiles when building their third house, when fulfilling 2 adjacent Bridge goals or when collecting 10 resources of the same type. They always take the topmost tile (the one closest to the Queen), among the revealed 3. Then move up the tiles and reveal another one.

# End of the game

Paco & Paca score this way:

- **VP scored during the game** (from fulfilled Bridge goals).
- **Invest track:** since Paco & Paca have not placed their marker there, they do not score VP from this track.
- **Guild Cards:** for each Guild, Paco & Paca score VP as you would do.
- **Structures:** for each structure, Paco & Paca score VP as you would do.
- **Favors of the Queen:** For each Favor of the Queen, Paco & Paca score 2 VP for each Rest tile chosen during setup.

## SCORING EXAMPLE FOR A GAME PLAYED WITH 2 REST TILES

During the game, Paco & Paca have scored 15 VP for fulfilling Bridge goals.

**The cards on their player board score:**

**Fox guild:**
4 cards x 2 stars = 8 VP

**Owl guild:**
6 cards x 3 stars = 18 VP

**Bear guild:**
7 cards x 3 stars = 21 VP

**Wild boar guild:**
5 cards x 2 stars = 10 VP

**Deer guild:** 0 VP

**Structures:**
4 cards x 3 VP = 12 VP

They gained 3 Favors of the Queen tiles (1 from the game start, 1 for placing their 3 Houses and 1 for fulfilling both Bridge goals on the same row). Since in this game 2 Rest tiles are used, each Favor of the Queen tile is worth 2x2 = 4 VP. Therefore, they score 12 VP.

**Paco & Paca have scored 96 VP. They are tough opponents!**

# Appendix

## FAVORS OF THE QUEEN

2 VP for each Favor of the Queen (including this one).

1 VP for each Flower or Sculpture symbol.

3 VP for each pair of Flower + Sculpture symbols.

2 VP for each Flower symbol.

2 VP for each Sculpture symbol.

1 VP for each Lumber / Stone / Sap / Food you collected.

2 VP for each Fox / Owl / Bear / Wild Boar / Deer guild card.

2 VP for each set of 4 different resources.

2 VP for each Red / Yellow Bird token.

3 VP for each Blue / Green Bird token.

1 VP for each Bird token.

3 VP for each House on the main board.

2 VP for each Structure card.

3 VP for each Guild (not Structure) from which you have at least 3 cards.

VP equal to your position on the Invest track.

2 VP for each upgraded Action tile.

2 VP for each fulfilled Bridge goal.

## CARD ABILITIES RELATED TO PAW MARKERS

Some card abilities depend on how many Paw markers the players placed on the main board during the round.

This card makes you gain 1 Lumber for each 2 Paw markers you placed during the round.

This card makes you gain 1 coin for each Paw marker you placed during the round.

This card makes you gain 9 coins minus the number of Paw markers you placed during the round.

## FLORISTS & SCULPTORS

Gain two Flower tokens with one symbol (1 or 2 stars) or one Flower token with two symbols (3 stars) and place them on any corresponding space of your player board.

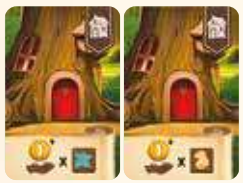

Gain two Sculpture tokens with one symbol (1 or 2 stars) or one Sculpture token with two symbols (3 stars) and place them on any corresponding space of your player board..

## BUILDINGS

All Buildings' abilities are both immediate and income abilities.

Gain 1 coin for each Structure you have (including this one).

Gain 1 coin for each Flower / Sculpture symbol you have.

Gain 1 coin for each card from the Wild Boar / Bear / Owl / Deer / Fox guild you have.

Gain 1 coin for each pair of Birds you have.

Perform one Invest action.

## TRANSPORTS

All Transports' abilities are both immediate and income abilities.

Gain 1 Lumber / 1 Stone / 1 Sap / 1 Food.

Gain 1 VP for each card from the Fox / Owl / Bear / Wild Boar / Deer guild you have.

Gain 1 VP for each Structure you have (including this one).

## PEDDLERS ABILITIES

Perform 3 Invest actions.

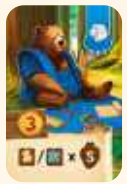

Gain 2 or 3 different resources.

Trigger the ability of up to two of your Structures.

Gain a Flower or Sculpture token with one symbol on it (1 or 2 stars) and place it on any corresponding space of your player board.

If you crossed 5 bridges, gain a Flower or Sculpture token with one symbol on it (1 or 2 stars) and place it on any corresponding space of your player board.

Gain a Favor of the Queen.

Upgrade one of your Action tiles.

Take a Bird from any card on the main board and trigger its effect as if it were on this Peddler card.

Gain 1 resource of your choice for each House you placed on the main board.

## BRIDGE GOALS

*Easy side*
Have at least 3 Lumber and 5 Sap.

Have at least 7 Lumber and 5 Sap.

*Easy side*
Have at least 5 Stone and 3 Food.

Have at least 5 Stone and 7 Food.

*Easy side*
Place at least 2 Flower and 4 Sculpture symbols on your player board.

Place at least 5 Flower and 3 Sculpture symbols on your player board.

*Easy side*
Move your Investment marker back 3 spaces (without gaining the coins).

Move your Investment marker back 4 spaces (without gaining the coins).

*Easy side*
Place your 3 Houses on the main board.

Have at least 5 Structures (this includes your Home card).

*Easy side*
Meet at least 7 Birds.

Meet at least 8 Birds.

## ACTION TILES

# Rules summary

## ROUND OVERVIEW

### 1) MORNING PHASE

#### A - COLLECT INCOME

**Guild income:** For each two cards in a column, collect the corresponding income.

**Structure income:** trigger the ability from all your structures, including your starting Home.

#### B - BIRDS ARRIVE

For each region, return to the box Birds from the previous round, then place a Bird face up on each card from its region.

#### C - THE QUEEN AWAKES

Return the Queen card from the previous round to the box (if any), then reveal the next one from the pile.

### 2) NOON PHASE

Select one of your Action tiles at the left of your player board and choose to Rest or to Work.

**REST:** Move the Action tile to the right of your player board and gain the coins indicated in the Rest section of the tile.

**WORK:**

- Move the Action tile to the right of your player board and activate it: most of them make your Worker cross one or several bridges you did not cross this round. Place a Paw marker on a bridge when you cross it. Additionally, you may spend coins to use the Balloon and optimize your movement.
- Choose a card in the region you arrived: if there is a Bird token on it, resolve its bonus and gain the Bird.
- Then, purchase the card by spending coins, resolve its effect and place it at the top (Character) or bottom (Structure) of your player board.

The Noon phase ends when each player has played 4 Action tiles.

### 3) EVENING PHASE

If your Worker ends the round in a region with one of your Houses, choose one Income to collect, then take back your 4 Action tiles and your Paw markers.

## END GAME SCORING
**(end of the 4th round)**

For each 5 coins spent, players progress one space on the Investment track. Then, players calculate their score by adding the following VP to those scored during the game:

**Investment track:** score VP corresponding to the position of your Investment marker.

**Guild Cards:** for each Guild (except the Deer guild), score VP this way: multiply the number of cards from this Guild placed at the top of your player board by the number or stars your resource marker passed on.

**Structures:** look at your least advanced resource marker to determine the VP value of each of your Structures.

**Favors of the Queen:** score each of them according to the way their score VP.

The player with the most VP wins the game. In case of a tie, the tied player with the most coins left wins the game. If the tie remains, tied players win the game together.

### RULES YOU MAY FORGET

- Only one player can claim the Queen card each round.
- Your Structure cards trigger their effect immediately and during each Income phase.
- You may claim any Bridge goals you want at the same time.
- Every time you place a Character card from each Guild at the top of your player board, place one of your Houses in a region.
- During the first Income phase of the game, you only trigger your Starting Home's effect.
- Invest Action: Make your marker progress one space on the Invest track OR Gain the coins indicated by the position of your marker, then return it to the leftmost space of the track.
