REVISED BASE GAME RULES

These rules apply both with and without the Genro expansion.

Build a Factory

You may build up to two Factories of the same type, but **you may not have more than two Factories of the same level**. (The Old Factory is considered a 1-level Factory.)

Build a Ship

You may build a Ship even if your Workers area has no empty space for an Expert Worker. In that case, do not take the Expert Worker from the chosen Destination (but still take the Upgraded Department token from there as normal). If your Workers area has an empty space, you **must** place the Expert Worker there as normal.

Automa Setup

In step 2, choose a Difficulty level and select:

- 2 random Solo Goal tokens for Easy level.
- 3 random Solo Goal tokens for Normal level.
- 4 random Solo Goal tokens for Hard level.

Then, discard 1 selected Solo Goal token of your choice and place the rest of the selected Solo Goal tokens in the dedicated spaces on the left side of the Automa board, starting with the top space.
