INTRODUCTION

Having gained extensive knowledge of the island's wondrous creatures, you can now harness the mystical abilities of your crew creatures to further assist your exploration!
Combine the various abilities of the Crews and Captains to create new strategies. You can now recruit even more diverse and mysterious creatures to your Crew!

COMPONENTS

A copy of Wondrous Creatures is needed to play this Expansion.

9 Crew Cards

15 Crew Members 1 magnetic and 2 regular meeples per color

Purple Crew

The purple Crew does not correspond to any of the 4 player colors (white, yellow, red, blue). Therefore, feel free to use these exquisite Crew members, regardless of whether they align with the color of your Player Board.

GAME SETUP

1 Proceed with the preparation of the Base Game (see pages 4-6 of the Base Game rulebook), with the following exceptions:

- When proceeding with step 13 - r of the Base Game setup, players do not take their player-colored Crew members.
- Instead, **draw 2 random Crew Cards**, choose one, and take 3 matching Crew members of the selected Crew Card.

NOTE Occasionally, confusion may arise during the game when multiple players opt for Crew members in identical colors. To avoid this, players have the option to use a Crew of a different color, even if they don't exactly match the chosen Crew Card.

- **Variant Rule A**: For players seeking a more competitive experience, acquire the Captain Board, Creature Cards, and Crew Cards simultaneously, and choose the combination of the three you want to use. This way, you can consider all variables at once!
- **Variant Rule B**: If you'd rather use your favorite Meeples, starting from the last player, in reverse order, choose the Crew Meeples to use and take the corresponding Crew Card.

2 **Discard the resource(s)** indicated on your Crew Card. Hence, players start the game with fewer resources than the Base Game.

E.g., if you use Crimsonaught, you discard 2 resources of your choice from your starting resources. Therefore, you can choose to remove 1 Fruit and 1 Coral.

Solo Mode

- You draw Crew Cards as per the rules outlined earlier.
- Tingent does not use Crew Cards.
- Game Setup Changes for Solo Scenario #1: Instead of discarding resources as indicated on your Crew Card, remove additional card(s) from your hand.

When Not Using Crew Cards

- Crew Cards are recommended for seasoned players familiar with the rules and card abilities of this game.
- You can also use the 15 Crew members included in this Expansion as substitute components for the Base Game Crew members and just exclude the Crew Cards.
- They are completely interchangeable with the 12 Crew members included in the Base Game. The in-game abilities are not affected as the Crews in this Expansion work exactly the same as the Base Game Crews.

CREW CARDS

- Crew Cards are **single-use** cards that have the potential to significantly enhance your gameplay when their abilities are strategically used at opportune moments.
- Crew Cards can only be used once per game and cannot be reactivated under any circumstances. After using the Crew Card's ability, the card is flipped face-down.
- Should there be specific conditions for utilizing their abilities, these conditions must be met first.
- Using the ability of a Crew Card is **a Free Action** and does not consume an Action.
- The abilities of Crew Cards are divided into 2 categories.

1. ONCE PER GAME

You can use the ability of your Crew Card ONCE at any time during your turn.

2. START OF GAME

Use this ability after game setup but before the 1st player starts their turn.

- Crew Cards are not Creature Cards and do not fit into any specific classification of Creature Cards (Instant Card, Continuous Card, Recharge Card, Energy Card, End Card). Therefore, when counting Creature Cards, Crew Cards are not included.

REVEALED TIME TOKENS

- Some Crew Cards utilize the concept of a Revealed Time Token.
- Revealed Time Tokens are Time Tokens that are face-up on the current Time Track.

E.g., you use Crimsonaught, which acquires Eggs based on the number of Revealed Time Tokens, as a Free Action. By observing the current Time Track, you can see that there are a total of 3 Revealed Time Tokens; therefore, you gain 3 Eggs of your choice. After using the Crew Card, flip it face-down to indicate its use.

TIP You can see through this example that the ability of Crimsonaught will become more potent as you use it later in the game.

APPENDIX

1. Albuserpent: Once per game, immediately complete an Achievement whose condition has been met, gain the Achievement Marker Reward and a Trophy. Achievements with conditions that have not been met cannot be completed. Each Achievement Slot can only accommodate one Achievement Marker, so you cannot place your marker on a slot already occupied by another player's marker. An Achievement completed in this way is part of the effect of Albuserpent and does not consume an Action.

2. Luteusaurs: Once per game, choose 1 Energy Card from your reserve and restore its Energy to its full Energy Limit. This effect only applies to Energy Cards, so it cannot restore the Captain Board's Energy.

3. Armoruber: Once per game, gain 1 resource of choice. For each revealed Time Token, gain an additional resource of choice. E.g., if there are currently 4 revealed Time Tokens, you can gain a total of 5 resources. These resources can be of the same type or a mix of different types.

4. Skaelruleus: At the start of the game, choose 2 cards from the Wilderness and add them to your hand, beginning the game with a total of 6 Creature Cards in your hand instead of 4. After taking the cards, draw 2 new cards from the deck to refill the Wilderness.

In Solo mode Scenario #3, first, apply the solo mode rules before utilizing the Crew Card's ability.

5. Tigriske: Once per game, immediately activate all Recharge Cards in your reserve in your preferred order.

6. Picochli: Once per game, immediately retrieve any 1 of your Crew members from the Map and place it next to your Player Board. You can retrieve a Captain or a regular Crew member.

7. Crimsonaught: Once per game, for each Revealed Time Token, gain an Egg of choice from the Supply. E.g., if there are 3 Revealed Time Tokens, you can gain 3 Eggs of your choice, either of the same species or a mix of different species.

8. Oceatce: At the start of the game, discard the Lock Token from your Captain Board and immediately unlock your Captain ability.

9. Felila: At the start of the game, immediately gain 2 VPs and shuffle the remaining unchosen Crew Cards. Draw one randomly, discard the resources indicated on the drawn Crew Card, and replace Felila with the newly drawn card for this game. If the newly drawn card has a "Start of Game" ability, immediately apply the ability.
In Solo mode Scenario #1, instead of discarding the resources indicated on the drawn Crew Card, remove additional card(s) from your hand.
